Eco Three Function Shower Handset

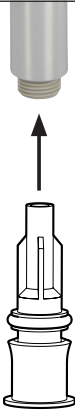

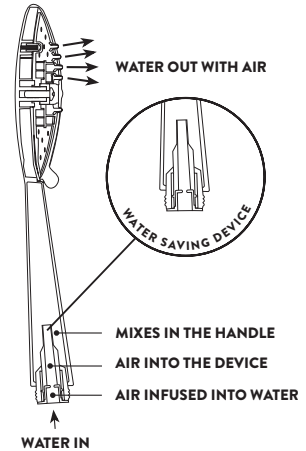

Eco handsets can save up to 50% water consumption when fitted with a water saving device, but should your household have low pressure water flow then the device can be removed to use the shower head at lower water pressures.

The Water Label litre per minute flow rate is only applicable when the water saving device is fitted.
***DO NOT use the water saving device with electric showers.**

Water Saving Device Installation

For use with higher water pressures above 0.5 bar simply insert the water saving device as illustrated into the shower handset during installation.

Do not use the water saving device at pressures below 0.5 bar or if a more forceful shower is required.

DO NOT USE THE AQUA AIR CARTRIDGE WITH ELECTRIC SHOWERS.

Easy to Clean

- This shower head features rub clean nozzles which are easy to unblock, helping to keep limescale build up to a minimum.
- To clean, simply rub the surface of the shower head gently in a clockwise direction with your thumb to break away any hard water deposits which could affect the shower's performance.
- To retain best quality finish, clean product regularly with a soft damp cloth. Do not use abrasive or chemical cleaners, as these may damage the product.

General Safety Advice

- For safety and convenience do not use with water above 65°C or with excessively high water pressure (max 50psi/3.5 bar).
- To avoid the risk of scalding you should always check the water temperature before entering the shower.
- Always take care when using hot water, especially with children and NEVER leave a child unattended in the bathroom.
